Ref. letter of support for the proposed Spitsbergen Airship Museum,

to whom it may concern

GLASBAU HAHN would like to express their support for the proposed Spitsbergen Airship Museum.

As a producer of highest quality display cases for museums all over the world, we feel that the project of an airship museum at Spitsbergen is a necessary and most valuable addition of high quality to the museum world, especially as there exist so few museums in the arctic regions. Apart from probably becoming a touristic attraction it will most likely come to represent an important nucleus of knowledge and experiences regarding one of the great expeditions on our planet.

The special geographical and political situation, in combination with the history of arctic expeditions form a perfect back-drop for a museum underlining the power of combined human efforts, regardless of race or nations.

We therefore would like to express our support for the construction of the airship museum, to be built to international museum standards.

At GLASBAU HAHN we will gladly help with our experience and knowledge, though we unfortunately will not be able to provide any financial support for the proposed museum.

With all the best wishes for the eventual creation and the success of the Spitsbergen Airship Museum we remain,

Yours sincerely

GLASBAU HAHN
