Our Re: 1171/D-2

5th March, 2007

Dear Sirs,

Subj: request for cooperation - Spitsbergen Airship Museum

with reference to your letter of 20th February, 2007, our re: 972/D-2, I'm pleased to come to know your project of a new museum about the history of airships in the Arctic. The establishment of the Spitsbergen Airship Museum in Longyearbyen has certainly a great relevance because of the location in Svalbard, the eminent international partnerships and the historical and scientific significance of the expeditions in the Arctic.

More particularly, I would like to express the high interest of the 'Museo Tridentino di Scienze Naturali' in your museum due to several reasons.

First of all, in the past we organized an exhibition and other circumstances of scientific information concerning the research about the polar circles and the discovery of such a hostile environment. Furthermore, our section 'Museo Gianni Caproni - Aeronautica, scienza e innovazione' preserves many documents about the history of flight and, among other things, some important objects and works of art relating to the two expeditions of Gen. Umberto Nobile.

Looking forward to know the advance of your project, I would like to wish you the best achievement for the Spitsbergen Airship Museum.

Yours sincerely,

Dr. Michele Lanzinger
Director

Michele Lanzinger
