9171 Longyearbyen Svalbrd,
Norway

Prot. Imont / EIM n. 67/07/P

Subject: International Polar Year 2007-2008 and the Spitzbergen Airship Museum

In the framework of the celebration concerning the International Polar Year, this Institution is greatly interested in joining the activity concerning the Museum to be opened in 2008.

The role of the Institute and the activities are to be shared and planned, along a path we are interested to walk together.

In this perspective our contribution could concern the collection of unpublished manuscripts in the Italian (public and private) archives and the promotion of initiatives in order to renew the attention and the memory in the population (above all children and young people). We could perform new on site environmental research activity in the tradition of the previous, too.

So I propose to find as soon as possible an occasion to meet together, that could be in the beginning of May 2007.

Waiting for news from you, I send my best regards.

The Chief Director
Antonio Ciaschi
